RE: Proposal by RedSpeed, IRFP No. 2024-02 for Automated School Zone Enforcement

Dear City of Doral:

At RedSpeed, WE SHARE YOUR MISSION of enhancing school zone safety through an advanced, violator-funded School Zone Speed Safety Program. As the industry leader in School Zone Speed Enforcement we are proud to be at the cutting edge of this safety technology. With our cutting-edge Lidar detector and fully specification-compliant system, we are confident that we can help **reduce speeding up to 95%**, as we have done for many others, including our client Gwinnett County, Georgia’s largest school district. Our experience in Georgia, where we have earned approximately 70% market share and won every single RFP in the state, is directly relevant as that state operates their school zone safety program under a nearly identical law. Having secured the first programs in Florida, including Miami-Dade County, Miami Gardens and Pinecrest, RedSpeed is on track to replicate our Georgia leadership in Florida.

RedSpeed has helped Gwinnett County, Alpharetta & others reduce speeding up to 95%.

As will be explained in more detail below, there are several advanced technologies that set RedSpeed apart. With our **American-made lidar speed detection, integrated with any third party ALPR system (including Flock, Vigilant, Rekor etc.)** and dedicated local Florida team, we will deliver a best-in-class, violator-funded safety program that will change driving habits and save lives. As you review all proposals, it worth considering the following RedSpeed advantages:

	RedSpeed®	All Competitors
Video Based Enforcement	✓	✗
Both Laser and Radar Options	✓	✗
Market Share in GA (Most Recent State with School Zone Speed Enforcement)	70%	30%
True Integration with Flock/Vigilant	✓	✗
Live View in Lanes	✓	✗
45 Day Archive in All Lanes	✓	✗
Florida Office and Technical Center	✓	✗
South Florida Clients	✓	✗
Local Interoperability Benefits	✓	✗

As stated, our proposal features best-in-class, American-made Light Detection and Ranging (Lidar) speed detection devices. Lidar is commonly referred to as "police laser" and while dominant in handheld speed detection, it is state of the art in photo enforcement. We are proud to have been at the forefront of introducing this technology to the industry. In fact, based on publicly available records, **RedSpeed is one of only two companies in the industry that has a track record implementing Lidar detectors.** All other competitors continue to use the same radar detectors they were using a decade ago. Lidar, with a single beam for each car, is easy for both courts and violators alike to understand. Lidar is the gold standard in speed detection for law enforcement.

RedSpeed also holds another key advantage: **we are the only vendor utilizing fully high-definition, lane-specific motion picture-based enforcement.** *Competing systems rely on still photo enforcement*, which captures far fewer readable images. HD Video enforcement is a far more effective tool because it virtually eliminates obstructions to license plates by increasing the number of enforceable images from which a license plate can be read. Where a traditional still frame camera takes a single violation image, RedSpeed HD Video captures hundreds of images as the car passes by, enabling our technicians to select a clean plate image even if there was a bus or truck obscuring other frames. This results in **approximately 40% more captured violations**, safer streets and additional revenue for the City.

HD Video enforcement provides another unique advantage: **ONLY RedSpeed can offer integration any third party ALPR provider of the City's choosing. This includes all ALPR providers mentioned in the RFP: Rekor, Flock, Vigilant, Insight, etc. Automated License Plate Reader (ALPR) systems.**¹ We have collaborated closely with these companies to optimize interoperability, and our intuitive soft-ware is already in use across the state. We have successfully integrated many Flock and Vigilant systems in current installations. Likewise, we have consulted directly with Rekor concerning this RFP and confirmed that our systems will be integrated without issue. Only RedSpeed offers this direct integration. RedSpeed offers 45-day archive storage of all HD Video feeds (overview + camera for each lane) which may be utilized for proving civil or criminal liability for incidents captured incidental to enforcement purposes, consistent with state law.

RedSpeed's software interface is easy to use and our references can attest to its simplicity compared to other vendors.² RedSpeed's local team of professionals will handle end-to-end implementation, from permitting through installation and ongoing support. RedSpeed offers unmatched Florida expertise and is proud to have offered significant support to the Legislature as it considered additional protections for students over the past three years. As part of these efforts, RedSpeed has also worked closely with the Department of Transportation on its permitting rule making, and has the expertise to get your program up and running at the soonest possible moment.

¹ Other vendors may try to fill this gap in technology by offering licenses for additional ALPR readers in their service but this is inferior for a number of reasons. Non-integrated systems add more boxes and unattractive / unnecessary clutter to the roadway infrastructure; likewise, ALPR cameras are of lower quality than RedSpeed's Axis cameras.

² For example, both Alpharetta and Roswell use Verra Mobility for School Bus Enforcement and have experience with both companies' platforms.

By comparison, **many of our competitors are new to Florida** and have no experience in the state, arriving only after passage of the State Law. RedSpeed has a significant, permanent Florida presence and maintains multiple offices in Florida including a South Florida headquarters and south Florida technical center near Doral in the City of Miami. Our CEO, Robert Liberman, lives full-time in Hallandale Beach. Our Operations Manager, Greg Parks is a longtime Florida resident with over a decade of experience in photo enforcement in Florida, as does our in-house counsel Michael McAllister, a Florida lawyer. Finally, **RedSpeed is proud to offer the City the option of local customer service via Inktel Solutions.** Inktel is a Doral-based call center recognized by Florida Trend as one of the top 100 places to work in South Florida and offers exceptional customer service. This would ensure that all customer interactions are handled directly in South Florida. This option is available at no additional cost to the City.

RedSpeed is extremely confident in our ability to deliver the best solution, service and results. **We are so confident that you will love RedSpeed that our contracts offer risk-free termination.** Our competitors are not so confident and often transfer the risk of early termination to the city, imposing significant termination penalties were thee city to terminate their program. Fortunately, no Redspeed client has ever sought early termination of an operating program.

CONCLUSION

RedSpeed's Safety Program includes exclusive and valuable features that will make the City's program successful. **The City of Doral deserves the very best technology,** and we are the only vendor that meets all of the City's desired technical specifications. We have a dedicated Florida team of professional implementers accountable to the City, and we are ready to hit the ground running. We are very excited at the prospect of partnering with you and would consider it a privilege to provide a higher level of safety to your residents. On behalf of the entire RedSpeed team, we look forward to your favorable response.

Respectfully submitted,

1. Describe Proposer's experience providing speed detection services, including: (i) identifying all Proposer's government contracts for speed detection services, and (ii) specifying all competitively awarded contracts for speed detection services between Proposer and public agencies or purchasing cooperatives.

RedSpeed is the leader in Automated Speed Enforcement and prides itself on implementation of cutting edge technology long before our competitors. Accordingly, **RedSpeed operates more than fifty active speed enforcement programs in Georgia**, the state that most recently implemented automated school zone enforcement, more than all competitors combined. Moreover, **RedSpeed has won each and every RFP in Georgia including: Gwinnett County, Clayton County, Alpharetta, East Point, Columbus, Norcross and Smyrna.**

Additionally, RedSpeed is the leader in Florida and is in the process of implementing hundreds of cameras statewide including for our nearby clients **Miami-Dade County, Miami Gardens, North Miami, Pinecrest and South Miami**. RedSpeed operates red light camera programs for Coral Gables and Sunny Isles Beach. A complete list of RedSpeed speed enforcement programs in Georgia and Maryland is attached as an exhibit.

RedSpeed Operates more than seventy (70) school zone programs nationwide – we believe this is more than all of our competitors combined.

2. Describe firm’s operating model including citation, billing, appeals process, and remittance to the City.

RedSpeed offers a totally turnkey, web-based program accessible from any web-enabled device. A complete and succinct (3:00) breakdown of our software and reporting capabilities has been encapsulated in a short video illustration, here: [Link \(https://shorturl.at/rRVXY\)](https://shorturl.at/rRVXY).

Turnkey means that RedSpeed provides all necessary equipment, maintenance software, processing, back office call center, appeal documentation, payment processing and related services. The City Traffic Enforcement Officer is responsible for reviewing and approving all violations and for appearing at appeals hearings as needed.

RedSpeed handles all violation processing including mailing of all Notices of Violations, court scheduling, and violator payments.

Funds are remitted to the City on a daily basis from a city-specific lockbox account.

In addition to full program support, RedSpeed also supports the City with Public Relations and notification to the public including the production of multilingual Public Service Announcements at RedSpeeds expense, along with professional public relations support, take home collateral for students and implementation of a 30-day warning period at each location with warnings mailed out to those exceeding the speed threshold.

3. Specify proposed implementation process and timeline from award and contract execution to speed detection commencement, including without limitation any proposed steps and associated timeframes for permitting, construction, installation, public awareness campaigns, etc., as applicable.

RedSpeed offers Doral the most experienced local team with the highest capability for timely installation and permitting. RedSpeed's CEO, Robert Liberman, is based in Hallandale Beach, Florida and RedSpeed maintains Technical Centers in Miami and Sarasota. Total camera installation time varies due to FDOT permitting review times and availability of power connections, but can generally be completed in 3-5 months, according to the schedule below (which excludes FDOT review time, including a 30 day Warning Period).

1 WEEK	Municipality Prep (CONCURRENT ACTIVITY) <ul style="list-style-type: none">• Contract executed• Business rules review• School Safety Zone details supplied• Doral provide details and signatures for GDOT permit application letters for all cameras
3-4 WEEKS	FDOT Permit Applications <ul style="list-style-type: none">• Speed study to confirm feasibility• Site meeting with civil engineering contractor and Power Utility Company• Commission engineering plans• Power connection order (New locations only)• Order Comcast if required – cellular modems will be used typically• Plans approval/Construction permit issued
14 DAYS	Field Construction <ul style="list-style-type: none">• Contractor installation to include ducting, foundations, power disconnect & signage• Power utility connection• System installation & calibration• GDOT Turn-On Inspection (if required) <p><i>As Required by the RFP, RedSpeed will "go live" within 30 days of Permitting.</i></p>
1 WEEK	Back Office Setup (CONCURRENTLY AFTER MUNICIPAL PREP) <ul style="list-style-type: none">• Create user accounts & roles• Set up notices and letters• Set up toll-free number and updated phone system• Update Phone System

Following construction, RedSpeed implements a 30-day warning during which time warning notices are printed and mailed to violators. As stated, RedSpeed will also assist the City with professional public relations, production of professional Public Service Announcements and other collateral for students to take home to their parents.

Finally it should be noted that RedSpeed has a complete compliance team including the law firm of Weiss Serota as outside counsel. Likewise, RedSpeed works with The Southern Group on statewide policy matters to ensure it is up to date with all state policy matters.

4. Specify Proposer's financial proposal, including the following:

- a. Specify proposed payment terms, including all applicable increases. The proposed payment terms must clarify whether the revenue share will be pursuant to a flat fee, percentage fee, or other. Failure to specify a cost to be incurred by the City or otherwise taken from the City's proportion of fees paid per infraction under Florida Statutes shall be an affirmation that Proposer is incurring such cost.**

Description of Pricing: 35% of collected revenue.

Fee includes all costs required and associated with system installation, maintenance and ongoing field and back-office operations. Includes camera equipment, installation, maintenance, violation processing services, DMV records access, mailing of required documents, lockbox and credit card processing services, call center support for general program questions, public awareness program support, and access to web-based SPE System for Certified Peace Officer review.

City is responsible for any Certified Mail fees, currently \$4.15 per piece.

- b. Identify any investment of the City, if any.**

The City incurs no capital investment and is responsible only for City responsibilities consistent with approval of citations and court time.

- c. Identify any limitations on the City's right to terminate for convenience, including any monetary penalties or expenses that may be incurred as a result of early termination.**

RedSpeed is proud to offer full termination for convenience of the City upon thirty days written notice. Unlike our competitors, this is a standard feature of all RedSpeed contracts. Fortunately, we have never had a client avail itself of this option.

5. Specify any other features of Proposal that the City should consider.

Please see the attached cover letter and videos as our response to Question 5.
