

Reduce Flood Risk

a library of flood mitigation strategies and resources

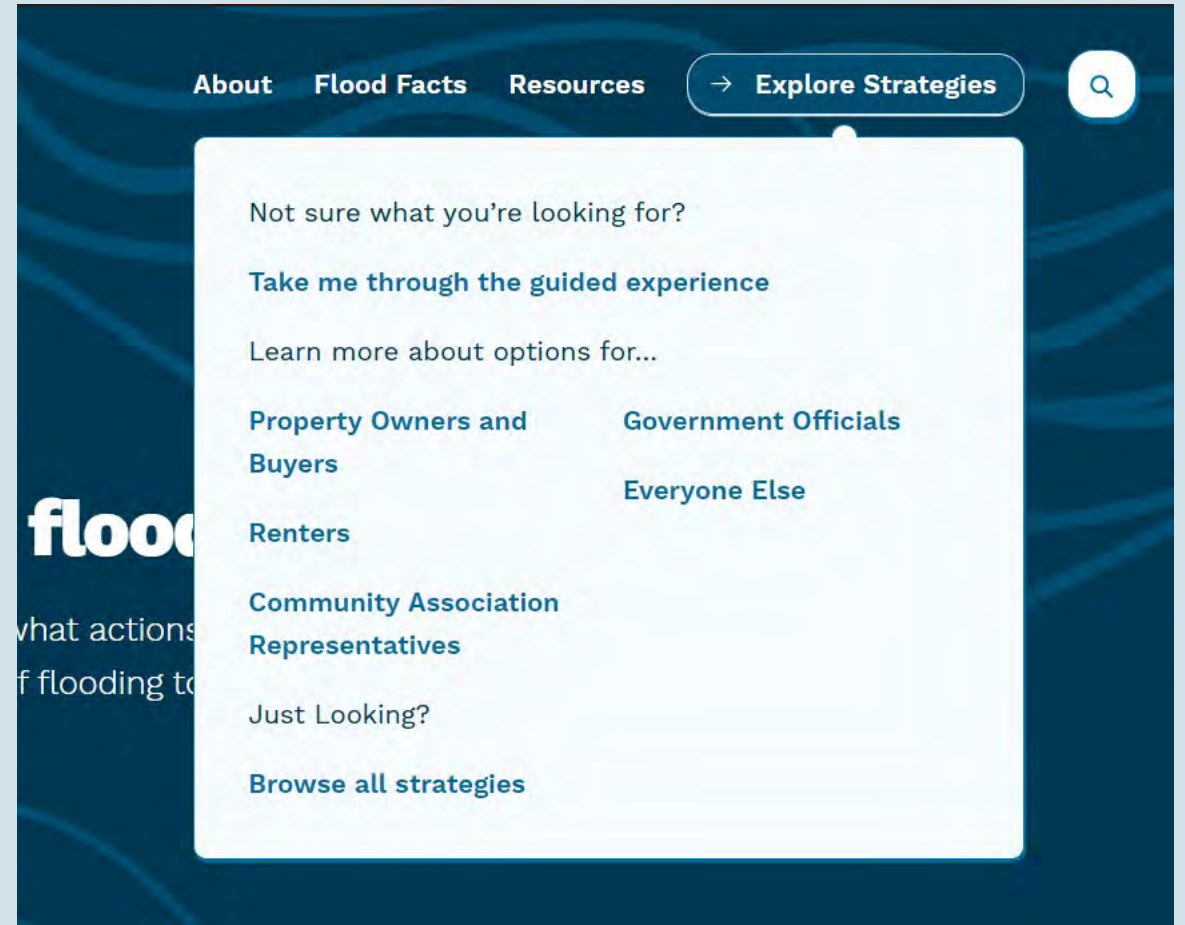

Objectives

- To help property owners and buyers in flood-prone areas identify strategies to reduce their property's risk of flooding.
- To connect anyone looking to reduce their flood risk with mitigation information and resources.

How ReduceFloodRisk.org Can Help You

- Provides an introduction to floodplains, flooding, flood hazards, and flood risk
- Guides your search for flood risk reduction strategies that can work for your specific property
- Connects you to additional flood mitigation resources
- Answers your questions

Guided Search

- Asks you to answer 5 simple questions:
 1. How do you identify? Are you a property owner or buyer?
 2. Which of the following best describes the property?
 3. What type of foundation does the structure have?
 4. Is the property located in a coastal high hazard area?
 5. To your knowledge, has the property flooded before?
 - How deep was the water during past floods?
 - Is the property in the potential path of a debris flow or ice flow?

Which of the following best describes the property?

Select one

Single-family residence

Multi-family residence ⓘ

Manufactured home ⓘ

Business

Government building

Agricultural building ⓘ

Filters

- Two types of filters:

- Those associated with the guided search that will help the system give you the best search results for your specific property.
- Those to help decide which mitigation option you might want to implement or explore further
