EQUIPMENT & FACILITY

SFM's headquarters facility, located at **7500 NW 74 Avenue, Medley, FL 33166**, encompasses approximately **20,000 square feet of dedicated office space, 15,000 square feet of warehouse space**, and nearly **three acres of secured operating yard**. This well-structured site serves as the central hub for our administrative, operational, and logistical functions. Our facility supports efficient equipment staging, inventory management, and dispatching of resources to service our clients throughout South Florida.

SFM operates with a **fleet of over 100 vehicles and specialized equipment**, allowing us to maintain service continuity, quickly deploy crews, and respond promptly to both routine and emergency needs. Our in-house fleet is supported by **three full-time mechanics** who provide year-round maintenance, ensuring our equipment remains fully operational and minimizing downtime.

This self-sustained infrastructure gives SFM the flexibility, scalability, and reliability required to successfully manage large, multi-site municipal contracts such as the City of Doral's landscape maintenance program.

EQUIPMENT

SFM has a comprehensive maintenance program in place to ensure that its fleet and equipment are well-maintained and functioning optimally. To achieve this, we have our Fleet Manager Alberto Salones along with a team of three full-time mechanics who are dedicated to overseeing the maintenance and upkeep of the fleet and equipment. Their primary responsibility is to ensure that all equipment is in top condition, minimizing downtime and maximizing operational effectiveness.

Additionally, SFM utilizes Whip Around, a web-based fleet maintenance software that allows us to track, document, and report vital data we need to optimize the performance of our fleet and heavy equipment. Every driver completes a pre-trip inspection daily as a preventative maintenance measure. Whip Around also tracks fuel usage and integrates with our vehicle tracking software, GEOTAB.

SFM has a max life equipment policy under which equipment is replaced once it has expired its life expectancy. This ensures that SFM's operations are not hindered by outdated or malfunctioning equipment. By implementing this policy, SFM is able to maximize the lifespan and performance of its equipment, leading to increased efficiency and productivity.

SFM currently possesses all the necessary equipment and qualified personnel required to successfully deliver the requested right-of-way maintenance services. Our fleet and tools are fully operational, well-maintained, and ready for immediate deployment.

8. QUALITY CONTROL

Every business *promise* quality service. How do you know who actually delivers? We use OrangeQC quality control technology to track and report on our performance for incredible data-backed insight and transparency.

We Inspect Regularly

We continually inspect your property and measure our own performance in quantifiable ways. Photos, timestamps, and GPS ensure each inspection accurately reflects how well everything was serviced.

You can always check our performance via the OrangeQC web portal. As soon as you log in, you'll see a dashboard with all our quality control data at a glance: our average inspection scores over time, how many inspections we've performed, our average response time for any issues, and more.

OrangeQC also compiles regular reports that give you greater insight into our performance. We've found this is a great way to communicate with our clients about our quality, what we're doing to improve, and our process.

We Use Data for Smarter Service

We regularly review the analytics of our performance at your site. This helps us ensure you're receiving the same high level of service you signed up for—and lets us nip problems in the bud.

The technology we use helps us track our performance at every level, from the entire site to individual line items in each site. That's how we get the details right while delivering an excellent overall maintenance.

We Make Communication Easy

We also use OrangeQC as a communication hub. It's fast and easy, and you'll always know your requests are going to the right place. The best part: you'll never have to install complicated software programs. All you have to do is send an email, log into a website, or (optionally) download a simple app.

Here's how it works:

- Whenever you need to put in a work order request or report a problem, you send an email to our dedicated address (or fill out a quick form on your computer or phone, whichever you prefer).
- OrangeQC automatically creates a ticket for each request.
- Our team gets the request immediately, assigns it to the right person, and makes sure it's taken care of fast.
- You can check on the status of an issue at any time, just by logging into your account.
- We track how fast it takes us to respond to every issue. This helps us know we are responding to your concerns and requests quickly.

Below is report provided to client that will show the evaluation of progress in 3 forms which include:

Email notifications are configured to notify SFM managers about the QC performance. The QC officer's iPad automatically synchronizes via a wireless network connection so that QC inspections can be tracked in real-time. Corrective action requests are immediately communicated to the relevant person.

All quality control inspections have precise timestamps to ensure frequency of monitoring and a clear indication of the date, time, area, and results of the monitoring process

SFM'S INTERNAL COMMUNICATION SYSTEM

In order to maintain high quality standards, SFM relies on effective internal communication to quickly remedy any account deficiency. Below is a representation of SFM's internal communication process when an area is found deficient by a quality control officer.

CLIENT TICKET SYSTEM

Through our Quality Control software, we ask our clients to use the "Ticket System". This feature helps us document and keep track of the quality of our services.

Here's how it works:

All you have to do is send an email to our Quality Control System at ticket@sfmtservices.com so we can address it. It's that simple! This email will trigger a ticket alert from the client to the SFM administration, which consists of the Account Manager, Supervisors, SFM's COO, and SFM's President.

This ticket will remain open sending continuous alerts until addressed by the Area Supervisor and our SFM Operations Manager, who will then respond. Their response will then trigger a "pending" designation. Once the ticket's content is addressed, it will be shown as completed and filed within your folder in our QC program. This will enable us to sporadically open the folder and see if there are any re-occurring trends that will allow us to proactively service your property.

9. SAFETY & TRAINING PROGRAM

At SFM Landscape Services, LLC, **safety is the foundation of our operational approach**. We understand that maintaining municipal landscapes—especially in high-traffic public areas like parks, right-of-ways, medians, garages, and coastal sites—requires strict adherence to safety protocols to protect our employees, City staff, residents, visitors, and the surrounding environment.

SFM has developed a **dedicated Landscape Safety and Training Program** that ensures all employees and subcontractors are fully trained, compliant with industry standards, and prepared to safely execute the Scope of Work outlined in the City’s solicitation.

Our Landscape Safety and Training Program is built around the following core objectives:

1. **Accident Prevention:** Minimize risk of injury to employees and the public through proactive safety planning and daily jobsite hazard assessments.
2. **Site-Specific Training:** Provide targeted training that addresses safety concerns specific to the City’s diverse service locations, including traffic management, irrigation systems, litter control, and coastal zones.
3. **Effective Communication:** Establish open communication channels between field crews, supervisors, and City representatives to immediately address safety concerns or incidents.
4. **Ongoing Reinforcement:** Maintain a strong safety culture through daily toolbox talks, safety incentives, and real-time feedback.
5. **Continuous Improvement:** Encourage employees to continuously monitor, report, and refine safety practices to support ongoing program enhancements.

The Landscape Safety and Training Program consists of various components:

1. Safety Training

- Comprehensive safety orientation for all new hires and refresher training for existing employees.
- Specific instruction on safe operation of mowers, trimmers, irrigation systems, and litter collection in active pedestrian and vehicular areas.
- Subcontractor onboarding and certification review to ensure alignment with SFM’s safety standards.

2. Risk Assessment and Jobsite Hazard Analysis

- Pre-service inspections conducted daily to identify site-specific risks, including traffic exposure, public interaction, irrigation hazards, and potential environmental concerns.
- Regular safety audits and hazard assessments across all service groups and locations.

3. Compliance with City and Industry Standards

- Full compliance with OSHA regulations, ANSI A300, ANSI Z133, GI-BMP, and City of Doral safety policies, including the safe management of equipment and chemical applications in public spaces.
- Strict use of City- and FDOT-approved Maintenance of Traffic (MOT) plans where applicable.

4. Personal Protective Equipment (PPE)

- Mandatory use of PPE, including high-visibility uniforms, gloves, safety glasses, hearing protection, and additional gear as required for specific tasks.

5. Safety Meetings and Toolbox Talks

- Daily toolbox talks covering relevant safety topics such as heat stress, safe equipment use, pedestrian awareness, and chemical handling.
- Weekly safety meetings to review trends, discuss incidents, and reinforce job-specific safety practices.

6. Safety Inspections

- Routine safety inspections conducted by SFM's Quality Control and Safety personnel to verify compliance with all safety protocols and equipment standards.
- Immediate corrective action is taken when deficiencies are identified.

7. Incident Reporting and Follow-Up

- Established channels for immediate reporting of incidents, near misses, and safety concerns.
- All incidents are formally documented, investigated, and reviewed to prevent recurrence.

8. Safety Incentives and Recognition

- A structured safety recognition program to reward crews and individuals who demonstrate exceptional commitment to safety practices.
- Positive reinforcement to maintain a proactive safety culture throughout the organization.

Integration with City Operations

SFM's Safety and Training Program is **fully integrated with the City of Doral's landscape operations.**

- **Real-Time Communication:** SFM supervisors maintain open communication with City representatives regarding safety-related updates, MOT deployments, and emergency responses.
- **Public Safety Awareness:** All crews are trained to prioritize pedestrian and vehicular safety, especially in high-traffic corridors, parking garages, and public green spaces.

SFM's Safety and Training Program is a **living system**—it evolves through employee feedback, industry advancements, and City collaboration. Our goal is to ensure that every task is performed with **zero compromise on safety, public protection, and service quality.**

In-House Arbor Care Training

As part of our commitment to specialized training, SFM offers a **robust Arbor Care training program**. Our Arbor Care crews are trained in compliance with:

- **ANSI A300 Tree Care Standards**
- **ANSI Z133 Arboricultural Safety Standards**

Training is led by **Luis Sanchez**, SFM's In-House Risk and Safety Manager and a certified safety instructor with the State of Florida. This internal expertise allows SFM to:

- Train and retrain employees as needed throughout the year.
- Maintain strict adherence to industry standards.
- React quickly to changing safety requirements or site-specific challenges.

This in-house capability is a competitive advantage that ensures our crews are consistently prepared to perform work safely and professionally.

HIGH DISINFECTION SERVICES

SFM can help mitigate the spread of infection including COVID-19 by providing High Disinfection Cleaning and Electrostatic Disinfection Services. SFM only uses hospital grade and EPA registered products that kill 99.9% of bacteria and viruses including COVID-19. A key advantage to the highly affective electrostatic technology is its ability to cover 100% disinfectant solution to the applied surfaces. SFM is one of few local companies providing “Electrostatic Disinfecting” while most companies are using a less effective method called fogging.

SFM currently offers two different methods of disinfection services:

1. Electrostatic Disinfection. Using only EPA registered disinfectants, Electrostatic Disinfection provides 100% coverage.
2. Manual Disinfecting. Complete High-Disinfection wipe down of all high-touch, vertical and horizontal surfaces. (Tables, desktop equipment, light switches, doors, doorknobs etc.)

One of the first COVID-19 cases in Miami-Dade County was in the Town of Bay Harbor Islands. SFM was contracted to provide high disinfection cleaning. Other clients we have helped with COVID-19 cases include:

- Miami-Dade County Parks -Daily disinfection of 75 parks.
- Miami-Dade County Emergency COVID-19 Clean-Up, Restoration and Decontamination Services to Red Roof & Hampton Inn hotels.
- Miami-Dade County Public Schools (The 1st school disinfected in the County).
- City of Coral Gables Police Department.
- City of Hialeah City Hall & Fire Stations.
- City of Miami Beach City Hall, City fleet, & facilities.
- Town of Bay Harbor Islands and many more.

After our disinfection services, we provide you with a Certificate of Disinfection.

This Promotes a safe & clean environment.

RE: CERTIFICATE OF QUALIFICATION

The Department of Transportation has qualified your company for the type of work indicated below.

FDOT APPROVED WORK CLASSES:
DEBRIS REMOVAL (EMERGENCY), LANDSCAPING

Unless notified otherwise, this Certificate of Qualification will expire 6/30/2026.

In accordance with Section 337.14(1), Florida Statutes, an application for qualification must be filed within (4) months of the ending date of the applicant's audited annual financial statements.

If the company's maximum capacity has been revised, it may be accessed by logging into the Contractor Prequalification Application System via the following link:
<HTTPS://fdotwp1.dot.state.fl.us/ContractorPreQualification>

Once logged in, select "View" for the most recently approved application, and then click the "Manage" and "Application Summary" tabs.

The company may apply for a Revised Certificate of Qualification at any time prior to the expiration date of this certificate according to Section 14-22.0041(3), Florida Administrative Code (F.A.C.), by accessing the most recently approved application as shown above and choosing "Update" instead of "View." If certification in additional classes of work is desired, documentation is needed to show that the company has performed such work.

All prequalified contractors are required by Section 14-22.006(3), F.A.C., to certify their work underway monthly in order to adjust maximum bidding capacity to available bidding capacity. You can find the link to this report at the website shown above.

Sincerely,
