City of Doral Application # PLAN-2410-0091 "FINGER LAKES WAREHOUSE"
Proposes new Office and Warehouse.

Folio no. 35-3033-041-0010

Dear Ms. Puglia:

The Department of Regulatory and Economic Resources – Division of Environmental Resources Management (DERM) has reviewed the above referenced Municipal Site Plan Review for compliance with the requirements of Chapter 24 of the Miami-Dade County Code (the Code) for potable water service and wastewater disposal. Based on the information provided, this site plan review is approved pursuant to section 24-43.1 the Code. With respect to other issues discussed herein DERM does not object to this application provided that all the conditions contained herein are complied with.

Potable Water Service and Wastewater Disposal

According to DERM records, public water and public sanitary sewers are currently abutting the subject property. Therefore, connection of the proposed development to the public water and public sanitary sewer system shall be required in accordance with the requirements of Chapter 24 of the Code of Miami-Dade County (the Code).

Please note that some of the collection/transmission facilities, which includes sanitary sewer gravity sewer mains, sanitary sewer force mains and sanitary sewer pump stations, throughout the County do not have adequate capacity, as defined in the Consent Decree between Miami-Dade County, Florida Department of Environmental Protection and the U.S. Environmental Protection Agency case 1:12-cv-24400-FAM. Under the terms of this Consent Decree, this approval does not constitute an allocation or certification of adequate treatment and transmission system capacity. At the time of building permits, DERM will evaluate and may reserve sanitary sewer capacity, through the DERM sanitary sewer certification process, if the proposed development complies with the provisions of the Consent Decree. Building permits for development in sanitary sewer basins that have been determined not to have adequate capacity cannot be approved until adequate capacity becomes available.

Please be advised, DERM review and approval is required for any proposed public or private sanitary sewer system. Each parcel within the proposed development that is required to be served by public sanitary sewers shall connect directly to the public sanitary sewer system, without traversing other

parcels. Private sanitary sewer collection and transmission systems are limited to one building per parcel connecting directly to a public sanitary sewer system and cannot traverse other parcels to connect to the public sanitary sewer system. If multiple buildings are within a parcel, each building shall connect individually to a public sanitary sewer system without traversing other parcels

Stormwater Management

Stormwater shall be retained on site utilizing designed seepage or infiltration drainage system. Drainage plans shall provide for full on-site retention of the stormwater runoff generated by a 25-year, 6-hour storm event.

Site grading and development plans shall comply with the requirements of Chapter 11C of the Code, as well as with all state and federal criteria, and shall not cause flooding of adjacent properties. Any proposed development shall comply with county and federal flood criteria requirements.

Tree Preservation

An aerial review of the subject property indicates the presence of tree resources. A site plan entitled "Finger Lake Warehouse" prepared by Manuel D. Fernandez, R.A., was submitted in support of the subject application and indicates the removal/relocation of non-specimen (a tree with a trunk diameter at breast height less than 18 inches) tree resources. Section 24-49 of the Code provides for the preservation and protection of tree resources. DERM has no objection to this application provided that the applicant obtains a Miami-Dade County Tree Removal Permit prior to the removal or relocation of the non-specimen trees on site.

A Miami-Dade County Tree Permit is required prior to the removal and/or relocation of any tree that is subject to the tree preservation and protection provisions of the Code. The applicant is advised that a tree survey that includes a tree disposition table will be required during the tree removal permit application process. Projects and permits shall comply with the requirements of sections 24-49.2 and 24-49.4 of the Code, including the specimen tree standards.

In accordance with section 24-49.9 of the Code, all plants prohibited by Miami-Dade County shall be removed from all portions of the property prior to development, or redevelopment and developed parcels shall be maintained to prevent the growth or accumulation of prohibited species. Please contact Jackelyn Alberdi at Jackelyn.Alberdi@miamidade.gov for additional information or concerns regarding this review.

Enforcement History

There are no open or closed enforcement records for violations of Chapter 24 of the Code for the subject property. There are no outstanding DERM liens or fines for the subject property.

If you have any questions concerning the comments or wish to discuss this matter further, please contact Ninfa Rincon at (305) 372-6764.

Sincerely,

A handwritten signature in blue ink that reads "Lisa M. Spadafina".

Lisa M. Spadafina, Director
Division of Environmental Resources Management
