RE: Doral Gateway Signs
CGA Proposal No. 14-7392

Dear Mr. Rojas,

We are pleased to submit this proposal for Professional Services on the above referenced project.

The purpose of these services are to develop comparative design solutions for gateway entry features that will serve as the basis of design for future phases of the project, which will include the further design development and construction engineering plans of the adopted design for implementation. While the final chosen design option will have enough information to understand its visual impact on the gateway experience of the Boulevard, possible material choices and general landscaping and lighting improvements envisioned to be a part of the gateway strategy, they will require further engineering and design development for constructability plans to determine a more accurate cost for construction, as well as possible coordination with the City, FDOT and private property owners for any necessary easements to accommodate their locations. This proposal is exclusively for conceptual design. No engineering, permitting, bidding, construction administration, design during construction or post-construction work is included.

I. Professional Landscape Architecture Services

Task 1 CGA will develop 3 schematic design options for gateway features into the City of Doral, planned for the entrances of Doral Boulevard from the Florida Turnpike on the west and the Palmetto Expressway on the east. It is envisioned that these options will consist of design alternatives of a general columnar form, so as to minimize its footprint, which are envisioned to be installed either in the public Right-of-Way or that may require a minimal easement in the future.

1. All design options, per Staff directive, will include the use of the words “Live”, “Work”, “Learn”, and “Play” as a major design element in a manner that can be removed/modified in the future without impacting the overall design of the feature.
2. All design options will include the use of the newly adopted City logo’s palm design.
3. One progress meeting with City Staff to comment and review on design options being developed for City Council.

Task 2 CGA will prepare a graphic presentation for the City Council that will include:

1. Previous options of the gateway design features as included in the master plan and its intent;
2. Previous iterations of the design options; and
3. Recommended 3 conceptual options for design selection by the City Council.

Task 3 CGA will attend one City Council meeting and deliver the conceptual features presentation where Council will select only 1 option for further development.

Task 4 CGA will consult with a sub-consultant sign manufacturer to determine optional solutions for fabrication. Together we will develop the chosen schematic design to the point to determine anticipated construction methods, material and finishes, lighting strategies, and an opinion of anticipated costs per unit.

Task 5 Prepare a second presentation with the developed schematic for City Council consideration.

Task 6 Attend a second Council meeting for final approval and adoption of the design.

Note: No other meetings besides those mentioned are included in this proposal.
